HONES IN INCINES

FARMINGTON WELL IS LOST

At 2,200 Feet Deep Drills Refuse to Work.

---WILL TRY AGAIN IN SPRING

FINE ORE IS STRUCK IN THE DALY MINE.

The Guffey-Galey syndicate's first well in the Farmington gas and oil field, fourteen miles north of the city, has been abandoned and no further work will be done until April 1 next, This is the announcement made by W. R. Rumbaugh, the syndicate's expert driller, who came from the well yester-day morning. The casing is now being withdrawn from the bore and within a few days the rig employed will be housed for the winter and Mr. Rum-baugh and his family will leave for Batson, Tex., where he will operate uning here. Regarding his work in this field during the past eleven months,

Mr. Rumbaugh sald:
"It has been impossible to keep the present well true. It is no longer possi-ble to operate the rotary, and there is nothing left to do in that well. A depth of 2,200 feet has been attained and a portion of the formation through which we have passed has looked very encouraging. The field I consider as 'a good gamble,' one that is worthy of being thoroughly tried out, and I have not the least doubt that work will be resumed by Messrs. Guffey and Galey in the spring. I put in last winter there and I do not care to tackle it again. It took me several months to get the well down the first 800 feet and the work was very expensive. two or three weeks had I waited until spring opened. I feel that I can do better by those who employ me and better by myself by going south for the winter, and that I shall do just as soon as I get everything in shape to leave, or in about two veeks.'

Mr. Rumbaugh has been an untiring worker since he began operations at the Farmington well and, while the formation was entirely new to him and while encountered numerous and at times most aggravating obstacles, he surmounted them one after another until conditions which it was impossible to control threw his well so far out of line that the drills could not be operated. Through the knowledge gained in this well, he says, he has no doubt of his ability to accomplish much more in the next one and, with any kind of

That the big operators have not decided to quit the field entirely may be taken as evidence that the sinking of the first well has been fruitful of tech-nical results, at any rate. The knowledge gained, of course, Mr. Rumbaugh has kept to himself and the operators in whose service he is. That he would consent to make it public is not to be expected, though he has, from time to time, spoken of the gas-bearing and other stratas through which the drills have passed, in general terms. Next year, it is hoped, Mr. Rumbaugh will be successful in bringing in a gusher.

RICH ORE IN DALY.

Three Feet of 100-Ounce Rock on Drain Tunnel Level. Fred R. Davis, who returned from a

trip to Park City Thursday night, says the livellest kind of interest is being manifested at camp over a recent dis-ciosure on the Ontario drain tunnel level of the Daly mine. The other day, Mr. Davis reports, over three feet of fine ore was encountered and driven through in pushing the drain tunnel on its way toward the Daly-West. Assays made on the ore at the Park shows it to contain over 100 ounces sil-ver and about 14 per cent lead. The ore carries no zinc and this fact is taken to mean a great deal, as the drain tunnel cuts the Daly mine about 700 feet below its deepest old workings. This is the third shoot of ore that

the drain tunnel was begun and, as there is still several hundred feet to run before the Daly-West lines are reached, and the country being penetrated a lively one, the talent at the Park are predicting great things for the mine's future. The work of driving for the Mazeppa ore bodies from the Federal tunnel is still being pushed, but Mr. Davis did not learn what the conditions there were, though the belief at camp was that connections.

Utah Stocks in Boston.

James A. Pollock & Co., bankers and brokers, yesterday received over their private wire from Paine, Webber & Co., one of their Boston correspondents, the following copper market comment and record of sales of Utah stocks on the Boston market, with range and closing quotations:

Boston. Dec. 9.—It looks now as if the panic of yesterday was over, and although some weak account may have to liquidate, we look for higher prices between now and New Year's, Quotations and sales: lief at camp was that connection would be made in the near future.

New York, Mr. Day's said, was fa

vorably commented upon and the unar most likely looking prospect in the di trict. In expressing that opinion, I said, the American Flag was not coun ed-it was already conceded that that was a mine, and a good one.

Everything about the Daly-Judge

mill was being brushed up, the machinery was being oiled and the impression at camp. Mr. Davis declared, was it would not be long iill the plant went into commission, though it might be that things were only being put in ship-shape for the winter.

SAVING FLOUR BOLD.

Process Using Oil as a Separator In-

troduced on Snake River. The Finley & Bandy Manufacturing company of Boise is erecting on Snake river one of the devices invented by F. B. Finley and D. H. Bandy for saving flour gold. This is the most Franklin. original idea yet brought out for the Granby work, and embraces a simple water lise kee concentration principle and an oil sep-aration that might be likened to the Elmore process. Since an attempt was ade to amalgamate Snake rive gold, which proved impracticable owing to the large quantity of material that passed over the plates and scoured them, the Finley & Bandy project has excited great interest among those who are striving to master this difficult

The concentrating device used first is of the belt table type, having nothing new in this respect, and is adjusted to save both the coarse cubical black sand and the fine gold. As the iron sand and flour gold constitute a heavy pro-portion of the fine material in a Snake river bar, the duty of the table is

The heavy product clinging to the belt and carried against the water current on the table is discharged into a larger tank than usual at the head of a Frue vanuer. The surface of the gradually reaching the stage entitling of a Frue vanner. The surface of the water in this tank is kept covered with of a Frue vanner. The surface of the water in this tank is kept covered with crude oil. As the fine gold values come in contact with the oleaginous substance adhesion continues until the oil globules are borne to the bottom by the burden of metal. The agitating device in this tank is not perfect in the experimental plant completed, yet the owners state that they have been able to effect a remarkable separation of gold from the black sand concentrate. If this concentrate product from the table were put through as thorough a mixer as the Elmore ptople use in

their oil concentration work, no doubt is felt by engineers that the Snake river's fine gold would be taken up from the iron sand with great dispatch and economy. The Elmore principle is nothing more than utilization of the discovery that the lustrous grains of certain metals will adhere to oil. Fine grinding is one of the necessary conditions of effective saving with the Elmore people, hence values in Snake river bars, which are known as fine flour gold, should be amenable to the process without any preliminary treatment.

MINING STOCK EXCHANGE.

After a Brisk Opening the Market Flattened Out.

Yesterday's forenoon calls on 'change' developes rather brisk trading at times, in the afternoon the market flattened out, and aslide from the little interest shown in May Day, nothing was done worthy of the day that he contemplated sending at winze down in the ledge for possibly another 100 feet, as the work now being done on the 256 level makes it certain that the main ore bodies are blow. After testing the ledge in the manner stated the next thing in order working shaft:

Tiptic Ore Shipments.

(Special to The Heraid.)

Eureka, Dec. 5.—Cre shipments from the trank Colwell' frank Colwell' frank

Yesterday's forenoon calls on 'change developed rather brisk trading at times, in the afternoon the market flattened out, and aside from the little interest shown in May Day, nothing was done worthy of mention. The stocks that were dealt in during the day brought about the same prices, on the average, as those prevailing on Thursday, with a total of 31,075 shares, worth \$4,587.52, changing hands.

Daly opened with the sale of 100 at \$2.69 and fifty-share packages went at \$2.65 and \$2.62½ on the open board. Daly-West sold in odd lots at \$12.47½ to \$12.62½, while Columbus Consolidated delivered 200 at \$1.25. May Day did business at 24½c to 25c, closing on a transfer at 24½c. Uncle Sam was steady at and close to 24¾c, while New York was sparingly ladied out at and around 25c. For 500 Wabash the purchaser shelled out 55c, and the balance of the list held its own.

Following is the list of final quotations and record of sales made:

COMING TO THE FRONT

Hannapah Property in Nevada Rapidly Making a Mine.

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$86,760, as follows: Silver, lead, gold and copper ores. \$27,460; base bullion, \$48,300; gold bars, \$11,000. Metal Markets.

Silver, 60c. per ounce. Copper, (casting), 14%c, per pound. Lead, in ore, \$3.50; New York, \$4.40 per 100 pounds.

Mining Notes.

Silver reached 60c, an ounce yesterday. As this is a point that it has seemed to balk at for months, local operators are inclined to think that it will hold firmer now that it has finally been allowed to touch ther mark touch that mark. John W. Lanley has gone to Goldfield and it is his intention to make that lively camp his headquarters from now

Manager Henry M. Crowiher, of the Continental company's Alta properties, returned from a trip to camp Thursday evening. He reports splendid progress being made in the construction of the tramway. The first car of wire rope has arrived, a few more days will see the towers practically completed and with the arrival of the cable-carriers and other iron work, it will not be long till the stringing of rope is under way.

The Pioneer sampler yesterday of the Continue of the Continue of the following described stock, on account of assessment No. 10. levied on the 2nd days of October. 1904, the several amounts set opposite the names of the respective shareholders, to-wit: The Pioneer sampler at Sandy yesterday reported with three cars of ore from American Fork, three from Tintic and two from Nevada.

FLEXIBLE FLYERS

The Sleds That Steer.

'Tis getting close to Xmas notwithstanding the fact that the snow has been delayed, and there are many boys and girls who are going to insist on having a Flexible Flyer. Why not get it now? We have all sizes. If not a Flexible Flyer we can give you any other kind of sled.

Said bonds shall bear interest at a rate not to exceed four (4) per cent per annum. Which interest shall be payable semi-annually, and said bonds shall become due and payable at the end of twenty (20) years from the date of issue, with the option reserved to the city to pay or refund the same at any time afer the expiration of ten (10) years after the expiration of ten (10) years after the expiration of ten (10) years after the expiration of denominations as the council may hereafter determine, and the net revenue from said water system shall be set apart for and shall be a sinking fund for the payment of said bonds and interest thereon.

The eighner's report also shows that the city now has an ample supply of canal vater from Utah lake, if supplemented by the Spring Creek water to for such ange purposes, and that if, for any reason. Spring Creek is not purchased, immediate provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for securing at least an equivalent provision should be made for exchange purposes, and that if, for any reason. Spring Creek is not purposed, and the city supplement provision should be made for exchange purposes, and that if, for any reason. Spring Creek is not purposed, and the city supplement provision should be can and the city supple

fund for the payment of said bonds and interest thereon.

Said election shall be conducted according to the statutes and laws of Utah, and shall be held in manner and form provided thereby.

much.
From the report it appears that the quantities of water that can ultimately be made available from the mountain sources, per day of 24 hours, will be as follows:

And that through the expenditure of \$53,000.000 about \$2,000.000 gallons of this water can be made available at once.

All of the above water should ultimately be acquired by the city, either through exchange or lease with the oresent users. To accomplish this it will be necessary to first provide an adequate stupply of water to take the place of that from the above named streams which in row used for irrigation.

Two-thirds of the waters of Mill creek and Big Cottenwood creek are used on the control of the special water committee.

Having had general supervision of the labors of the special water committee.

Having had general supervision of the labors of the special water committee.

RICHARD P. MORRIS, Mayor.

T certify that the above report was duly adopted by the council November 2.

1994, and I further certify that the above is a true copy of said report.

(Scal.)

J. S. CRITCHLOW. ..42.600.000 gallon

Notice of a Special Election Upon the Question of Incurring Bonded

Indebtedness.

Whereas, The city council of Sait Lake City, Utah, be an ordinance duly passed by said council on the 21st day of November, 1904, and approved by the major of said city on the 27nd day of November, 1904, and approved by the major of said city on the 27nd day of November, 1904, and approved by the major of said city on the 27nd day of January, 1905, for the purpose of submitting to such qualified electors as shall have paid a proper of said city, and also the question of incurring a bonded indebtedness in the sum of cight hundred and fifty thousand (855,000,000 dollars for the purpose of incurring a bonded indebtedness in the sum of cight hundred and fifty thousand (855,000,000 dollars for the purpose of incurring a bonded indebtedness in the sum of cight hundred and fifty thousand (858,000,000 dollars for the purpose of lefraying the expense of establishing sewer mains and a sewerage system in the southern and western portions of said city, where no sewerage system in the southern and sewerage system in the southern and western portions of said city, where no sewerage system in the southern and western portions of said city, where no sewerage system in the southern and a sewerage system in the southern and the proposed of the series of the series of the purpose of submitting to the led for the purpose of submitting to the led for the purpose of defraying the expense of increasing the water submitting to the led for the purpose of submitting to the led for the purpose of defraying the expense of increasing the water submitting a water system to conduct the submitting at water submitting a water system to conduct the submitting at water system to conduct the submitted submitted the submitted submitted the submitted submitted the submitted submit

portant source of supply, and that this may be accomplished by the expenditure of the \$215.000.00 named in the estimate for the purchase and pumping of Spring Creek and will afford sufficient water to exchange for all the mountain streams, including Little Cottonwood.

He also recommends that, in any event, the item of \$40.000.00 for the proposed Parley's canyon power station, should be retained, as its value to the city would more than compensate for its cost in handling and disposing of sewage for the lower portion of the city, if not needed for pumping Spring Creek water.

It also appears from the engineer's re-

insert thereon.
